Summary

Results-oriented professional with extensive experience in operations management, manufacturing, and technical support. Proven ability to streamline processes, improve operational efficiency, and implement safety protocols. Currently advancing skill in software development and Six Sigma methodologies, eager to leverage a strong technical foundation and dedication to continuous improvement in a challenging role.

Work Experience

Eaton, Technical Resource Center

Technical Support Engineer: 2022 - present

- Provide technical support and troubleshooting for Uninterruptible Power Supplies, KVM systems, console servers, and network equipment
- Achieved Six Sigma Yellow Belt certification, actively participating in continuous improvement initiatives to optimize technical support processes
- Collaborate closely with cross-functional teams to enhance product reliability and customer satisfaction through proactive problem-solving

Royal Power Solutions

Tool Maker: 2017 - 2022

- Developed and implemented a Quick Die Exchange procedure, reducing setup times by 50%
- Assessed, updated, and enforced safety protocols, significantly reducing workplace risks and improving overall operational safety
- Practiced 5s methodology, streamline workspace efficiency and driving continuous improvement in manufacturing processes

Portillo's Restaurant Group

Opening Store Team Manager: 2010 - 2017

- Led the successful launch and operational setup of ten new restaurant locations nationwide
- Managed comprehensive budgets, effectively reducing costs through optimized labor scheduling, inventory purchasing, capital asset management, and technology implementation
- Recruited, trained, and mentored teams, establishing operational excellence and high customer service standards from day one
